Acknowledge

First and foremost, we would like to express our sincere gratitude to our instructor, Mr. Nhan, for his dedicated guidance, valuable feedback, and continuous support throughout the entire process of completing the CourierXpress project.

We would also like to thank all members of Group 01 for their hard work, dedication, and mutual support in completing this project together. Without the effort and cooperation of each member, this project would not have been completed successfully.

Although we have tried our best to complete the CourierXpress project, it may still have some shortcomings. We sincerely welcome any comments and suggestions from our instructor to improve our work in the future.

Respectfully yours,

Group 01

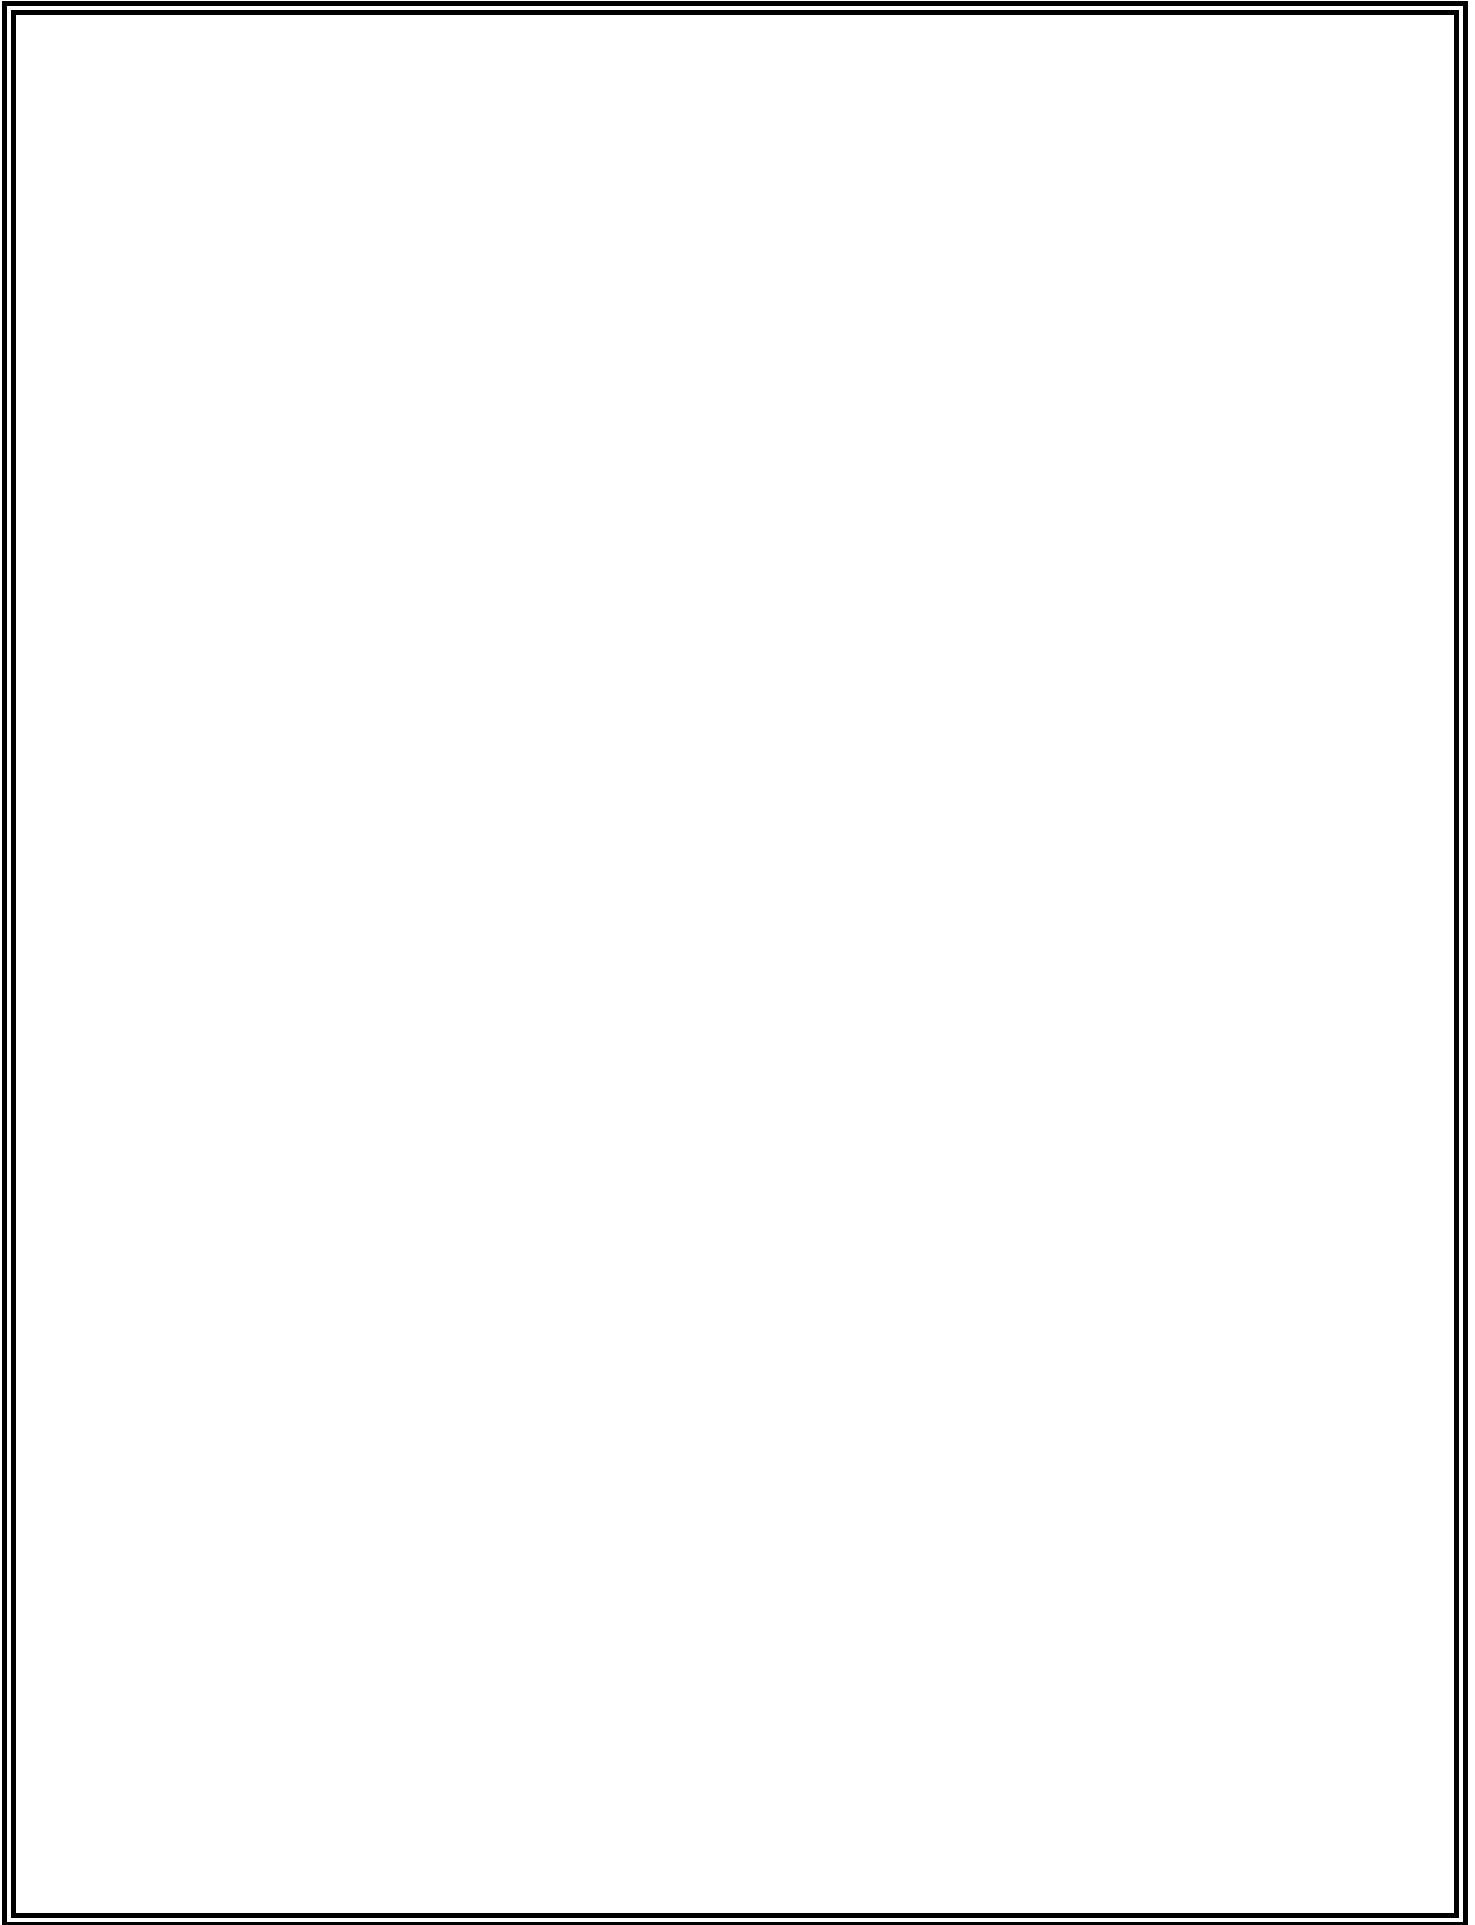

Synopsis

CourierXpress is a web application designed to automate courier service management, enabling admins, agents, and customers to work on a unified system, replacing inefficient manual processes.

The application allows users to manage shipments, customer information, and billing quickly and accurately. Admins oversee the entire system, while agents handle branch operations and customers use the platform to support their needs.

In addition, the system provides features such as automatic notifications and report generation, improving management capabilities and performance evaluation.

As a result, CourierXpress helps reduce errors, save time, and enhance operational efficiency, contributing to improved service quality in the logistics industry.

Review 01

DesignPlan: CourierXpress	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10/04/2026	Version 1.0	Page No: 1 of 91

Problem Definition

In today's fast-paced logistics industry, courier services face challenges in managing consignments, maintaining customer records, and providing real-time tracking updates. Currently, many courier companies handle these tasks manually, which leads to errors, delays, and inefficiency.

The CourierXpress aims to automate courier operations through a centralized web application that enables admins, agents, and customers to efficiently manage bookings, billing, delivery tracking, and reporting.

Functional Requirements

The Web application will be designed with a set of forms/pages with menus representing choice of activities to be performed.

Following are the functional requirements of the application:

1.1 Admin Features

1.1.1 Admin Login/Logout

- Admin logs in using a unique username and password.
- Secure session management to prevent unauthorized access.
- Logout option to terminate the session securely.

1.1.2 Courier Management

- Add new courier with details (sender info, receiver info, courier type, weight, charges, delivery date, tracking ID).
- Update courier details (e.g., change receiver address, modify delivery status).
- Delete courier entries when required.
- Assign courier to an agent/branch.

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	LE THANH NHAN
Signature		
Date		

DesignPlan: CourierXpress	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10/04/2026	Version 1.0	Page No: 2 of 91

1.1.3 Billing Management

- Automatic bill generation at the time of booking.
- Bills to include courier ID, sender & receiver details, cost breakup, taxes.
- Option to reprint or export bills.

1.1.4 Agent Management

- Create new agents with branch-specific login credentials.
- Update agent details (branch, contact number, working status).
- Assign couriers to agents.
- Disable/remove inactive agents.

1.1.5 Customer Management

- Maintain customer database with contact and address details.
- Search/filter customers by name, city, phone, or ID.
- Update customer profile information.
- Link past courier history to each customer.

1.1.6 Shipment Tracking & Status Management

- View shipment counts by status (booked, in transit, delivered, cancelled).
- Update status of couriers at any stage.
- Assign delivery dates and expected arrival time.
- Notify customers on status changes.

1.1.7 Reporting & Analytics

- Generate reports (Optional - XLSX/CSV format).
- Types of reports:

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	LE THANH NHAN
Signature		
Date		

DesignPlan: CourierXpress	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10/04/2026	Version 1.0	Page No: 3 of 91

- o Date-wise shipment report (all couriers booked in a specific range).
- o City-wise shipment report (outgoing and incoming).
- o Agent/branch-wise performance report.
- Download, print, or export reports.
- Dashboard graphs showing delivery trends, delayed shipments, etc.

1.1.8 Notifications & Communication

- Send notifications to customers on:
 - o Booking confirmation.
 - o Shipment pickup.
 - o Delivery completion.
- Manage notification templates from admin panel.

1.2 Agent Features

1.2.1 Agent Login/Logout

- Agent logs in with branch-specific credentials.
- Logout to securely end session.

1.2.2 Courier Management (Branch-Specific) • Book couriers for customers directly from the branch.

- Assign tracking IDs automatically.
- Update delivery status (picked up, in transit, delivered).
- Print shipment receipts for customers.

1.2.3 Branch Reporting

- Generate reports only for their branch.
- View number of shipments handled daily/weekly/monthly.

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	LE THANH NHAN
Signature		
Date		

DesignPlan: CourierXpress	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10/04/2026	Version 1.0	Page No: 4 of 91

1.2.4 Communication

- Send delivery notifications to customers.
- Receive admin messages regarding branch performance.

1.2.5 Dashboard (Branch-Specific)

- Shipment counts (booked, in transit, delivered).
- Pending deliveries list.
- Search shipments by tracking number or customer name.

1.3 User Features

1.3.1 Registration & Login

- New users can register with name, email, phone, and password.
- Login with credentials to track shipments or manage bookings.
- Forgot password and reset option.

1.3.2 Courier Booking (Optional – if enabled for customers) • Fill

booking form (sender info, receiver info, courier type, weight).

- Automatic tracking number generation.
- Print receipt after booking.

1.3.3 Courier Tracking

- Track shipment by entering tracking/consignment number.
- Display shipment details (origin, destination, booking date, status history, estimated delivery date).
- Print/download tracking details.

DesignPlan: CourierXpress	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10/04/2026	Version 1.0	Page No: 5 of 91

1.3.4 Notifications

- Receive notification for booking confirmation, in-transit updates, and delivery confirmation.

1.3.5 Profile Management

- Update personal details like phone, email, and address.
- View history of all past shipments booked.

Non-Functional Requirements

There are several non-functional requirements that should be fulfilled by the Web application.

These include:

Safe to use: The Web application should not result in any malicious downloads or unnecessary file downloads.

Accessible: The Web application should have clear and legible fonts, user-interface elements, and navigation elements.

User-friendly: The Web application should be easy to navigate with clear menus and other elements and easy to understand.

Operability: The Web application should operate in a reliably efficient manner.

Performance: The Web application should demonstrate high value of performance through speed and throughput. In simple terms, the Web application should be fast to load and page redirection should be smooth.

Security: The Web application should implement adequate security measures such as authentication. For example, only registered users can access certain features.

Availability: The Web application should be available 24/7 with minimum downtime.

Customer Requirements Specifications

I. CRS/Requirements Specifications

Customers/Project Undertaken:		
1.	List of inputs to the system	
		- Name, email, phone, password for registration.
		- Login credentials (email, password).
		- Courier booking details (sender info, receiver info, service type, weight)
		- Tracking/consignment number for shipment tracking.
		- Personal profile updates (phone, email, address).
2.	List of outputs expected from the system	
		- Registration success/failure notification.
		- Login success/failure notification.
		- Courier booked successfully.
		- Tracking number generated.
		- Shipment details displayed (origin, destination, booking date, status history, estimated delivery date).
		- Profile updated successfully.
		- Notifications received (booking confirmation, in-transit, delivery confirmation).
3.	Overview of processes involved in the system	

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	LE THANH NHAN
Signature		
Date		

DesignPlan: CourierXpress	Document Name: Customer Requirements Specifications	SWD/Form No.02/CRS-BVer1.0
Effective Date: 10-04-2026	Version 1.0	Page No: 7 of 91

		- Register new customer account.
		- Verify customer login credentials.
		- Submit courier booking form.
		- Generate tracking number automatically.
		- Search shipment by tracking number.
		- Display shipment status history.
		- Update personal profile information.
		- Receive notifications on status changes.

Admin/Project Undertaken:		
1.	List of inputs to the system	
		- Username and password for login.
		- Courier details (sender info, receiver info, service type, weight, tracking ID).
		- Agent details (name, branch, contact, login credentials).
		- Customer details (address, city, note).
		- Shipment status updates.
		- Report filters (date range, city, agent).
		- Notification templates.
2.	List of outputs expected from the system	

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	LE THANH NHAN
Signature		
Date		

DesignPlan: CourierXpress	Document Name: Customer Requirements Specifications	SWD/Form No.02/CRS-BVer1.0
Effective Date: 10-04-2026	Version 1.0	Page No: 8 of 91

		- Login success/failure notification.
		- Courier booking confirmation.
		- Automatic bill generated.
		- Agent account created/updated.
		- Customer records updated.
		- Shipment status updated successfully.
		- Reports generated (Date-wise, City-wise, Agent-wise).
		- Notifications sent to customers.
3.	Overview of processes involved in the system	
		- Verify admin login credentials.
		- Add/Update/Delete courier information.
		- Generate tracking ID automatically.
		- Add/Update/Disable agent accounts.
		- Search/Filter customer records.
		- Update shipment status at any stage.
		- Generate reports based on filters.
		- Send notifications to customers.

Agent/Project Undertaken:	
1.	List of inputs to the system

II. CRS/Customer Acceptance Criteria

S.No	Customer's Acceptance Criteria
1	- Given Admin role when manage couriers then view, add, edit, remove a courier in list.
2	- Given Admin role when manage agents then view, add, edit, remove an agent in list
3	- Given Admin role when manage customers then view, add, edit, remove a customer in list
4	- Given Admin role when manage branches then view, add, edit, remove a branch in list
5	- Given Admin role when manage invoices then view, print an invoice in list
6	- Given Admin role when manage reports then view, filter a report in list
7	- Given Admin role when manage notifications then view, add, edit a template in list
8	- Given Agent role when manage shipments then view, add, edit, update a shipment in list
9	- Given Agent role when manage reports then view, filter a report in list
10	- Given Agent role when manage notifications then view, send a notification in list
11	- Given Customer role when manage profile then view, edit a profile in list
12	- Given Customer role when manage bookings then view, add a booking in list
13	- Given Customer role when track shipment then view a shipment status in list
14	- Given Customer role when manage notifications then view a notification in list

1. Project Details	
-	Name of the Client: CourierXpress
-	Date of Project Plan: April 2026
-	Project Vision/Objectives:
	+ The vision of CourierXpress is to develop a modern, efficient, and userfriendly web-based system that automates the entire courier service management process. The system aims to minimize errors, save time, and improve operational efficiency for logistics businesses.
	+ The project also strives to provide a better user experience, enabling admins, agents, and customers to interact on a unified, transparent, and convenient platform.
	+ In the long term, CourierXpress aims to become a flexible, scalable, and practical solution, contributing to the modernization and optimization of operations in the logistics industry.
-	Scope:
	+ CourierXpress focuses on developing a web-based application to support the management of the entire courier service process within the system.
	+ The system includes core functionalities such as user registration/login (admin, agent, customer), shipment management, customer management, billing management, and report generation. In addition, it supports notifications and centralized data storage for easy access and management.

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	LE THANH NHAN
Signature		
Date		

DesignPlan: CourierXpress	Document Name: Customer Requirements Specifications	SWD/Form No.02/CRS-BVer1.0
Effective Date: 10-04-2026	Version 1.0	Page No: 13 of 91

	+ The project scope is limited to the development and implementation of the management software, and does not include real-world operations such as physical transportation or delivery. The system is designed to run on a web environment with a backend database for storing and processing information.
-	Our understanding of the client organization:
	+ The client is a company in the courier and logistics industry, needing to manage tasks such as shipments, customers, and billing.

	+ Currently, their processes are manual or not well optimized, which can cause errors and delays. Therefore, they need a system to make management easier, faster, and more accurate.
	+ The system should also help connect admins, agents, and customers, improving work efficiency and overall service quality.
-	Project Organization with Responsibilities and Authorities:
	+ Group 01 is responsible for the entire development of CourierXpress system. + Mr. Le Thanh Nhan is the instructor and approver of the project.
-

Effective Date: 10-04-2026	Version 1.0	Page No: 20 of 91

-	Testing Activities:
	+ Unit Testing: Test each function individually to ensure it works correctly.

	+ Integration Testing: Test the interaction between modules to ensure they work together.
	+ User Acceptance Testing: Verify system meets all customer requirements.
	+ Bug Tracking: Record and fix all bugs found during testing.
-	Backup and recovery strategies:
	+ Source code backed up on GitHub regularly after each development session.
	+ Database backed up daily using phpMyAdmin export.
	+ Project documents saved on Google Drive as backup.
	+ In case of system failure, restore from latest backup available on GitHub or Google Drive.

Final checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	
3	Are the GUI content devoid of spelling mistakes?	
4	Is the application user-friendly?	
5	Is the Website launching correctly in all popular browsers?	
6	Are all the forms validated with proper criteria?	
7	Do all text links lead to the appropriate website?	
8	Do all image links lead to the appropriate website?	
9	Are all the images and links clearly visible on the page?	
10	Does the Web page work properly in all the tested browsers?	
11	Does the Web page take too long to be loaded fully?	
12
